

Our pillars

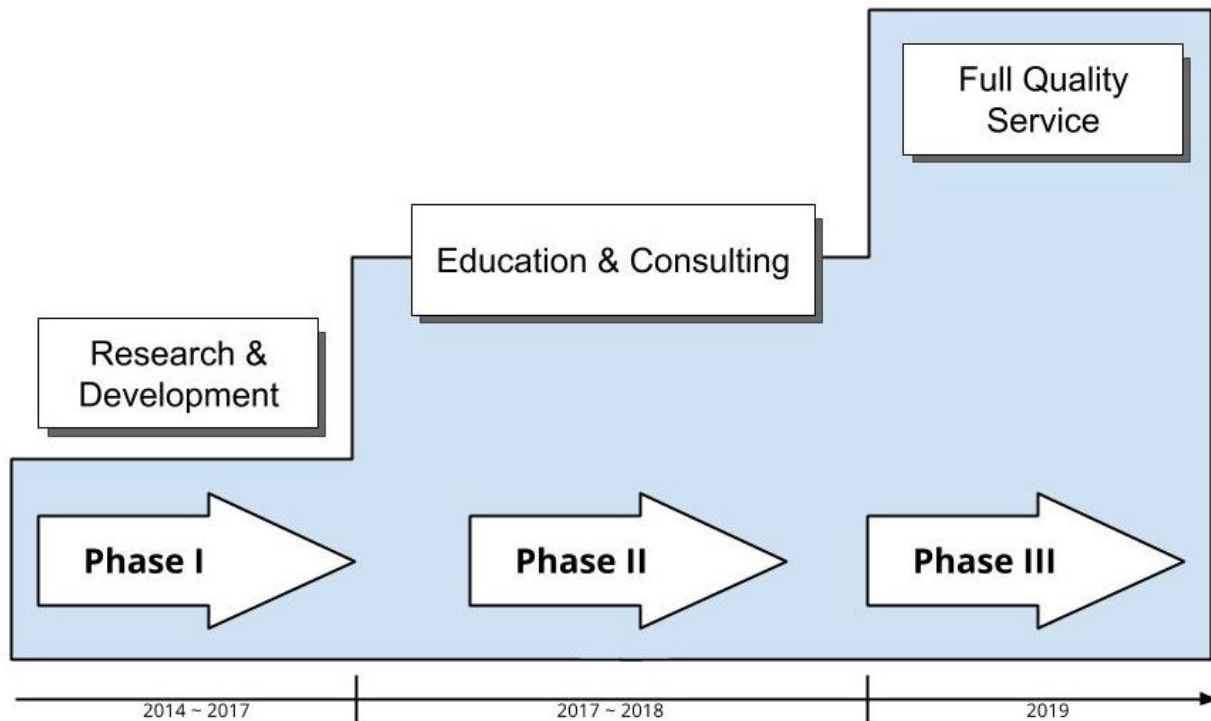

Our mission

- Establish, promote and support a proper system of internships in Japan
- Create a legal, safe and worry-free environment for entities taking interns
- Help internship-seekers everywhere to find internships in Japan (free of charge)
- Support internship-seekers to study Japanese
- Grant scholarships to interns in need who wish to do an internship in the non-profit sector, start-ups and artistic or cultural activities
- Actively support women's empowerment in the business world
- Support and educate companies and organizations in Japan about the system of internships
- Support a network of opportunities for everyone, including networking events
- Create a long-lasting and worthwhile relationship between companies, organizations and interns

Our progress

Phase I

At the beginning of our activities, we will focus on research and networking to build a strong base of partners and supporters.

With their help and scientific research & development we will create an internship system in Japan and educational programs about proper internships.

Companies and organizations are able to connect with prospective interns.

Phase II

Our main activity in this phase will be to support and educate issues regarding internships.

We will offer training and consulting to adapt and implement the internship system step-by-step.

Companies and organizations will learn about the benefits of the internship system and how to strengthen their team by adding interns.

Phase III

In this phase we will be able to provide a full quality service to interns, organizations and companies.

This will include direct introduction of interns, internship job fairs as well as scholarships, certification programs and annual awards.

Based on our work and experience with leading organizations we will work together to propose legal changes to smooth internship implementation.
